Name: Dhruv Jain
Roll No: 2301045
Batch: T12

Experiment 11

Aim: To understand the basics of project management and to plan, track, and manage a software project using a project management tool (Trello).

Theory:
Project management involves planning, organizing, and managing resources to successfully complete project goals. Project management tools help teams collaborate, assign tasks, monitor progress, and meet deadlines efficiently.

Trello is a Kanban-based project management tool that uses boards, lists, and cards to represent projects and tasks visually.

Software Requirements:
- Web Browser (Chrome/Edge/Firefox)
- Internet Connection
- Trello Account

Procedure:
Step 1: Open a web browser and go to trello.com
Step 2: Login or sign up using your email ID
Step 3: Click on Create → Create Board
Step 4: Name the board as "Student Management System"
Step 5: Create lists: To Do, In Progress, Testing, Done
Step 6: Add task cards under To Do list
Step 7: Assign due dates and members to cards
Step 8: Move cards across lists as task progress changes

Part A: Agile Setup

1. Create a new board named **"Agile Project – Student Management System"**

2. Create lists:
    - Product Backlog
    - Sprint Backlog
    - In Progress
    - Testing
    - Done
3. Add Product Backlog cards:
    - User Login Module
    - Student Registration
    - Course Management
    - Attendance Tracking
    - Result Generation
4. Add user story description:

    As a user, I want ___ so that ___
5. Move selected cards to **Sprint Backlog**
6. Add checklist to Sprint cards:
    - Design
    - Coding
    - Unit Testing
    - Integration
7. Assign sprint due date, members, and sprint label

Part B: Automation using Butler

8. Click **Automation → Rules**
9. Create rule:
    - When all checklist items are completed → Move card to **Done**
10. Create rule:
    - When due date is marked complete → Move card to **Done**
11. Create rule:
    - When label "Bug" is added → Move card to **Testing**

Part C: Monitoring

12. Enable **Calendar Power-Up**
13. Review completed sprint tasks
14. Conduct Sprint Retrospective

Expected Output

An Agile Scrum board with automated task movement and sprint visualization.

Expected Output:

A Trello board displaying tasks categorized under different workflow stages with progress tracking.

Implementation:
